

Skills of the future

Whilst there is massive disruption across industries and changing workforce dynamics, we think it's important to **reimagine the future and act at pace**. Hence **people in the machine age are extremely critical**, and we have started on this journey to help organisations prepare for new roles and manage outlook to this change, so we all remain relevant.

WHY

- Build relevant future roles and skills across the enterprise in line with digital ambition
- Develop an indispensable ecosystem by leveraging best of both technology and talent
- Create a strong org wide communication plan and emphasise on sense of urgency on 'Why Now'
- Clarify and confirm facts on looking at future skills initiative as an opportunity and not threat

HOW

- Conduct experiential workshops for individual assessment of their own fixed mindset versus learning mindset
- Create visibility and impact through various learning modes (games, bite size modules, e-learning, digital badges etc.)
- Assess current and future skills and competencies of employees to map to future skills
- Run future skills initiative through a L&D and business integrated task force

WHAT

- Develop technical expertise in digital technologies
- Create org wide awareness and excitement on what the future means for everyone
- Encourage continual development and recognise achievements
- Collate ideas across functions, teams, levels etc. on what technologies and how to manage impact
